# ABOUT US

G-Tech Infrastructure Consultancy Private Limited (or G-Tech Infra) is an infrastructure consulting firm specialized in providing smart sustainable infrastructure engineering solutions to its client. The company was established in 2008 with an idea to contribute and make smart infrastructure by maintaining highest quality standards and professionalism.

G-Tech Infra is providing consulting sectors in various fields that include: Urban Infrastructure Development projects in Water Supply, Sewerage, Drainage & Solid Waste Management (SWM), Inland Waterways, Water Resources Highways, Bridges, Tunnels, Railways, Hydro Power and Buildings.

Equipped with an exemplary finesse and expertise in the area of Consulting and Engineering; we provide Advisory Services, Pre-Feasibility and Feasibility Studies, Detailed Engineering, Proof Checking, Value Engineering, Detailed Design, Detailed Project Report preparation, Construction Supervision and Project Management and Design Supervision Consultancy.

We are a team of employees with diverse range of expertise and experience. The corporate office in Gurgaon, Haryana is the driving force behind the Company activities, centralising the management specialists and design staff and providing overall direction and supervision to the ongoing projects. We also have an extensive network of retained experts, who add strength to our team in sharing commitment to deliver exceptional results for our clients.

Consistently progressing with an exponential growth rate, we have earned a high value reputation as one of the top notch and fastest growing infrastructure consultants in India; we truly and honestly attribute our success to positive approach, commitments, competencies, innovation and client centric outlook towards delivering and completing projects within time frames.

## OUR MISSION & VISION

G-Tech Infra's mission is to provide sustainable and smart infrastructure solution to its client and to respond to the changing needs of ever changing market keeping in view the environmental aspects while remaining mindful of our responsibility to work towards a better world.

G-Tech Infra strives to become one of the leading infrastructure engineering solution provider by maintaining highest order of work ethics, quality and timely delivery to the utmost satisfaction of Client.

## KEY BUSINESS SECTORS AND SERVICES

Sl. No.	Key Sectors	Allied Services
1	Water & Environment ( Water Supply, Solid Waste Management, Sewerage & Drainage, Hydrology and Irrigation)	<ul style="list-style-type: none"><li>● Survey</li><li>● Feasibility/ Pre Feasibility Studies</li><li>● Planning &amp; Design</li><li>● DPR preparation</li><li>● Construction Supervision</li><li>● Design Supervision</li><li>● DPR preparation</li><li>● Environmental Impact Assessment (EIA)/ Environmental Management Plan (EMP)</li><li>● Project Management ( including Bid Process Management)</li><li>● Social Impact Assessment</li><li>● Urban Planning &amp; Design</li><li>● Landscape architecture</li><li>● Govt. and Institutional strengthening</li></ul>
2	Transport (Inland Waterways, Roads and Highways, Traffic, Rail Infrastructure, Ports)	
3	Bridges & Structures	

# 1. Water and Environment

G-Tech Infra provides technical expertise to manage and deliver solutions across every aspect of water cycle, and to ensure the highest standard of care and advice in protecting the environment. We offer expert knowledge in water infrastructure, and in the provision of environmentally sustainable services for infrastructure projects. We provide consultancy services in water supply, waste water treatment and water recycling projects, and also offer services in environmental engineering. We specialize in the design and implementation of best practice irrigation systems of all sizes, using proven and innovative methods to plan, size, optimize, control and prepare detailed designs of pump stations, pipe networks and open channel irrigation systems.

- 24 x7 Water Supply
- Sewerage & Drainage
- Solid Waste Management
- Hydrology
- Irrigation

# 2. Transport

G-Tech Infra provides innovative solutions for transport infrastructure projects. With expertise across range of technical areas. G-Tech Infra seamlessly manages all aspects of transport engineering in diverse environments. Our capabilities extend through all stages of project delivery, from inception to completion including: Feasibility Studies, computer modeling, survey & design, tender evaluation, concept through to detailed design, contract management, construction supervision, quality assurance, commissioning, and operations and maintenance.

- Roads & Highways  
(Planning & Design, Construction Supervision)
- Inland Waterways
- Bridges & Structures
- Traffic & Transport Planning
- Rail Infrastructure
- Ports
- Tunnels

### 3. Bridges and Structures

G-Tech Infra has extensive experience in the investigation, concept planning, design, documentation, verification and proof engineering of all types of steel, composite, reinforced concrete, prestressed concrete, and cable stayed bridges, as well as all retaining walls and associated structures. G-Tech Infra provides assessment of existing bridges, reviews of structural design life, and the design and management of bridge rehabilitation programs. G-tech Infra has experience in range of bridge types, including: balanced cantilever segmental bridges; steel box and conventional girder bridges, railway under-and-over bridges; major concrete arch bridges; cable stayed bridges; and precast and in-situ segmental bridges. This experience extends to a range of associated transport structures, including large culverts and pipes, retaining walls, foundations (including piling), reinforced earth walls, tunnels and transport service facilities.
